

RUST STAIN REMOVER

Product Description

Rust Stain Remover is a powerful solution formulated to effectively remove rust stains from various surfaces. It utilizes the rust-dissolving properties of Oxalic acid combined with Phosphoric acid and surfactants to penetrate and lift stubborn rust stains, restoring the surface to its original appearance without causing damage. RSR is very effective as a Bore Stain Remover in sensitive areas and gardens.

Applications:

Ideal for removing rust and bore stains from surfaces such as cement render, concrete, metal, tiles, porcelain, and masonry. Suitable for use in industrial, commercial, and residential settings.

Physical Properties:

Appearance: Clear liquid

Odor: Mild

pH: Acidic

Solubility: Soluble in water

Chemical Properties:

Oxalic Acid Content:

Phosphoric acid

Surfactant Content:

Environment

This product and the ingredients are not expected to bioaccumulate and are readily biodegradable.

Directions for Use:

Apply the Rust Stain Remover directly to the stained area using a watering can, brush or spray.

Allow the solution to dwell on the rust/bore stain for several minutes to penetrate.

Gently scrub the stained area with a brush if needed and wash with water using low pressure spray.

Rinse the surface thoroughly with water to remove the residue.

For stubborn stains, repeat the process as necessary.

Coverage

A single application is expected to cover ~80-100m²

Cautions:

Use in a well-ventilated area.

Wear gloves and eye protection when handling the product.

Keep out of reach of children.

Do not mix with bleach or other chemicals without proper guidance.

Packaging: 20 Lt containers
